Driven and efficient **NodeJS** full stack developer with 4 years of experience. Proven to develop, lead, and deliver on-time software using **Angular**, **AWS Serverless**, **React-Native**, **React**, **Flutter**, and **expressJS**. Looking for a NodeJS software developer position.

Experience

TCB enterprise

June 2020 - Present

MPX Dev Group

Application Developer 2

October 2022 - Present

Application Developer 1

January 2021 - October 2022

- Promoted to the position of Application Developer 2 after less than 2 years for exceptional work ethic and never being idle.
- Designed and created a skeleton loader using **RxJS** and backend parallelization which reduced production load time by 96%
- Created a custom auth flow resembling **OAuth 2.0** within a 1 month deadline, which connected to NetSuite (third-party)
- Earned a company Spirit of Excellence award for leading tech talks covering **AWS Cognito**, **Cypress**, and **Akita Store**; and handling first round PR reviews and questions while appointed as the *point of reference*
- Laid the foundation for **reactive** web applications on **Angular**, **Typescript / HTML** web applications by refactoring with **RxJS**.
- Delivered various secure **lambdas** and **DynamoDB** tables using **AWS Serverless**, quicker than the allotted time
- Remained flexible throughout a variety of projects, including production tax form generation issues in legacy **.NET** systems and data migration from legacy systems into new systems
- Completed a **Flutter** mobile/web app containing an Agile style retro board and story pointing screen, utilizing **Firebase** to achieve seamless data transfer across users
- Effectively onboarded and trained developers on TASC's systems
- Conceived and implemented node and shell scripts used by all teams for time consuming tasks

TASC (Total Administrative Services Corporation)

**The nation's largest privately held third party benefits administrator.*

Application Developer Intern

June 2020 - January 2021

- Successfully debugged production issues using **AWS Cloud Watch** and **SQL queries** through MySQL

Captain Service

August 2020 - Present

**An uber-like mobile application for mechanics, electricians and plumbers.*

Lead Developer and Stakeholder

- Connected two devices together using **SocketIO** hosted on **GCP** served from a **NodeJS Express** backend. Calculated the nearest available technician and navigated them to a customer using **Google geolocation**
- Implemented **Stripe** express accounts and Stripe Payments
- Created 3 user types (Customer, Provider, Technician) within one **React Native** application, alongside a **React** admin console

Uline

May 2019 - August 2019

** Privately held and leading distributor of shipping, industrial and packaging materials to businesses throughout North America.*

Windows Systems Engineer Intern

- Server Install Script – solo project
 - Configured new servers remotely using **Python** and HP-ProLiant **PXE** boot over a local network, together with batch scripts and HP-ProLiant native scripts to setup **iLO** (Integrated Lights-Out) and IP addresses
- Server database manager – solo project
 - Developed a web application using **ASP.NET** which generated **SQL** queries from user selected columns based on pre-defined queries which merges multiple servers, databases, tables and columns together through primary keys.

Birdwell Solutions

May 2019 - March 2021

**A software company that separates the client from developer by managing teams of developers, designers, and scrum masters.*

Head of Engineering

- Led a team of ten developers, throughout various projects with **React Native**, **React apps**, and **NodeJS Express**
- Utilized **JIRA** software to manage teams with an **agile** mindset

Education

Bachelor of Science in Computer Science and Mathematics certificate

University of Wisconsin-Madison December 2020
